(Automated External Defibrillator)

MODERN LIVING MEETS
MEDICAL PREPAREDNESS

KERALA'S FIRST BUILDER TO IMPLEMENT AED SYSTEMS,

In Line with Recommendations from IMA Thiruvananthapuram,
Setting New Standards in Safety & Earning Award-winning Recognition

Prioritizing Your Safety, Always At Cordial Felicitous, your health and safety are of utmost importance to us. As part of our commitment to creating a secure living environment, we have installed Automated External Defibrillator (AED) in key common area within the premises. These life-saving devices are designed for quick and effective response during cardiac emergencies, ensuring residents and visitors have immediate access to emergency support when it matters most. It's one more way we go beyond the expected to care for our community.

The combination of CPR and early defibrillation is effective in saving lives when used in the first few minutes following a collapse from sudden cardiac arrest.

The AED system includes accessories, such as a battery and pad electrodes, that are necessary for the AED to detect and interpret a person's heart rhythm and deliver an electrical shock if one is needed. It is designed to be used by people who have received minimal training.

Automated External Defibrillators (AED) are portable, life-saving devices designed to treat people experiencing sudden cardiac arrest, a medical condition in which the heart stops beating suddenly and unexpectedly.
